yha humne querySelector() ke andar ky daal kr elements ko target kr skte hai ye bataya hai, it does not return the list of elements

18:31

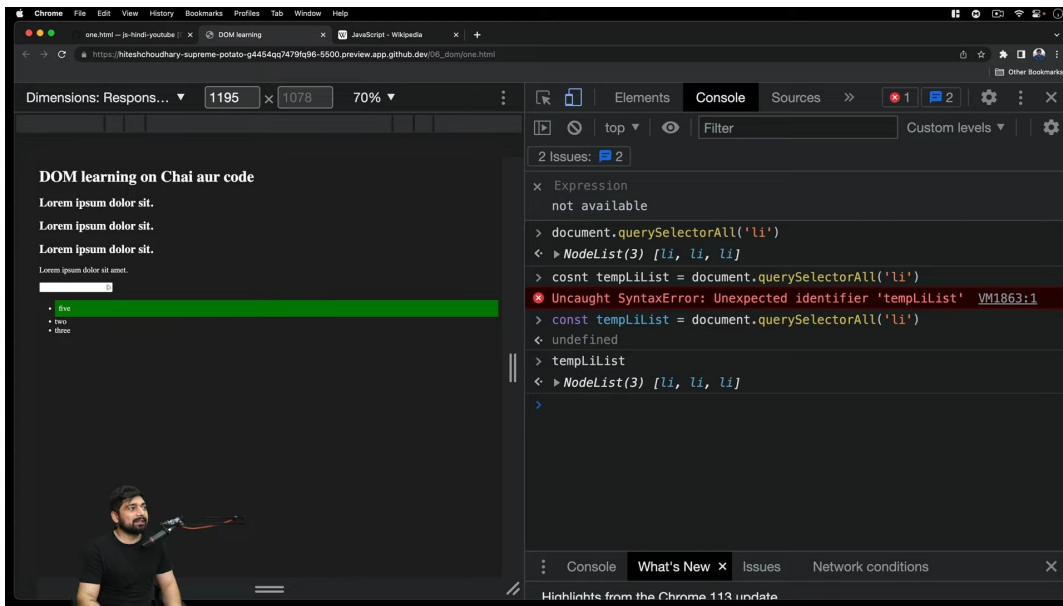

▶ 19:21

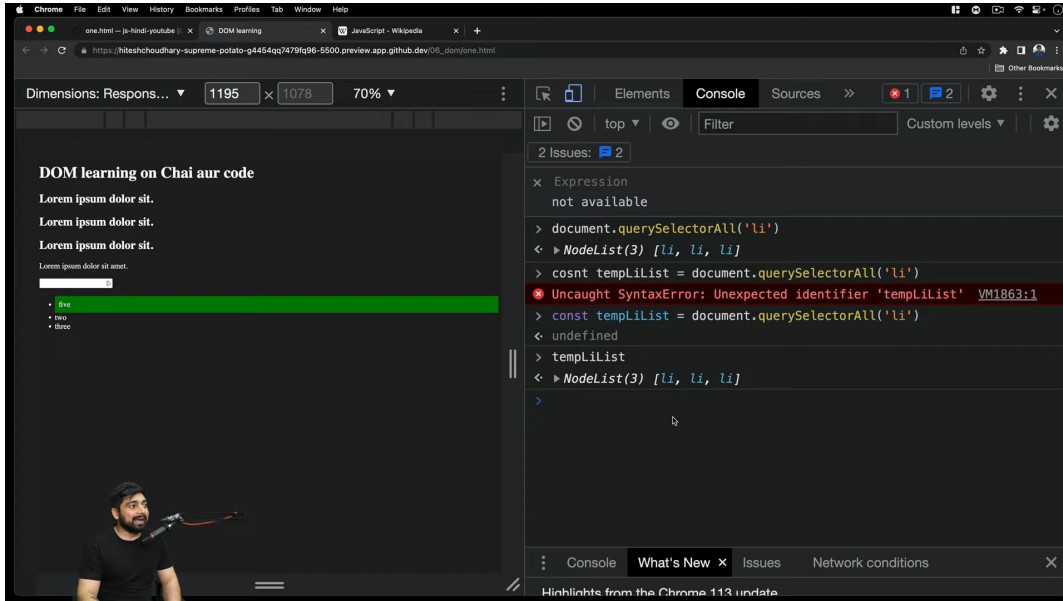

▶ 20:56

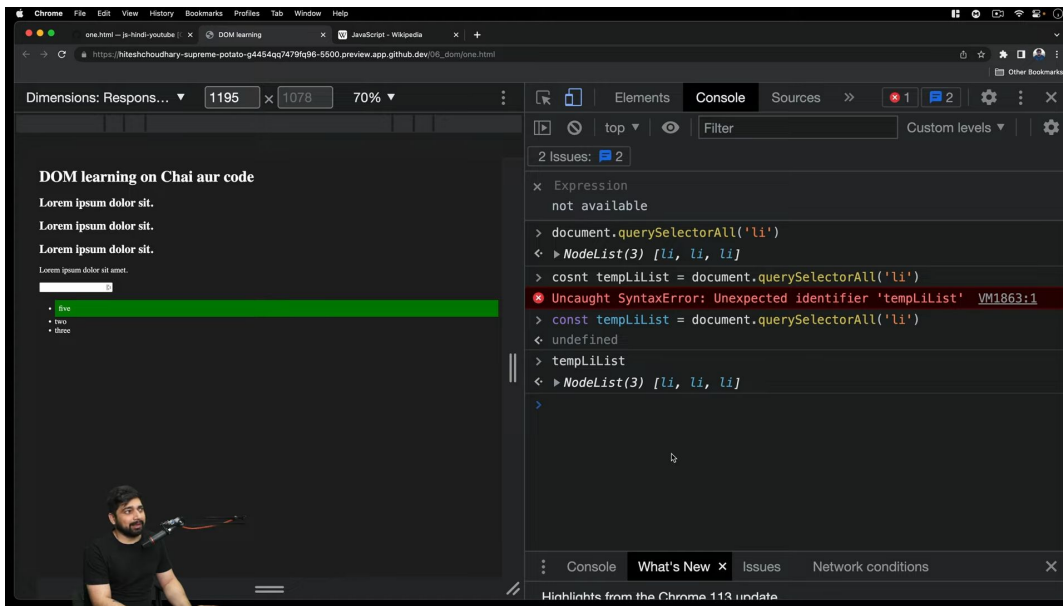

▶ 22:15

▶ 24:23

▶ 24:24

querySelectorAll('li');

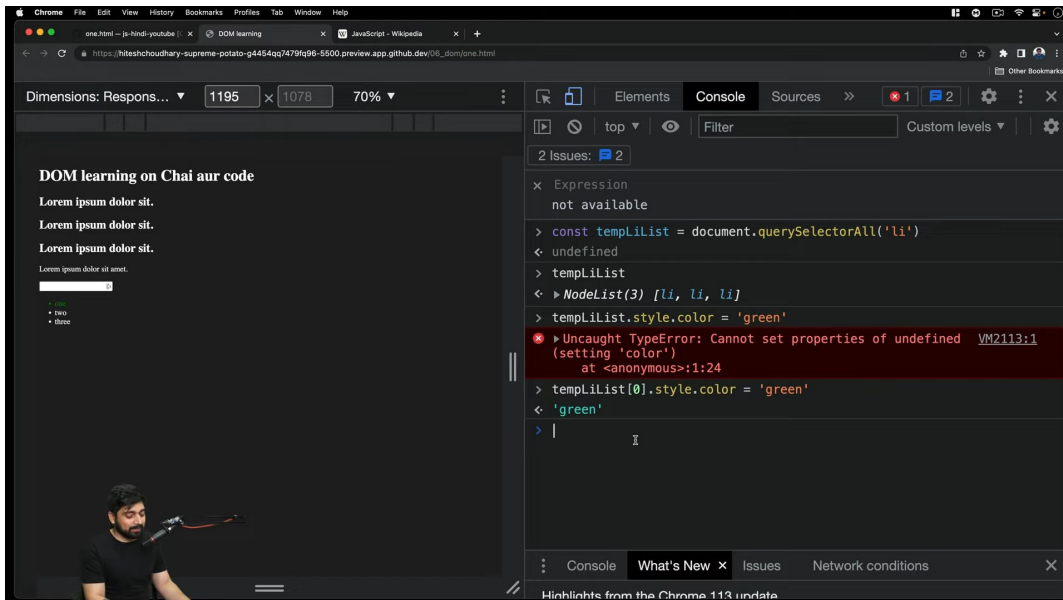

24:30

26:08

cannot give color directly to the element in case of
querySelectorAll()

26:12

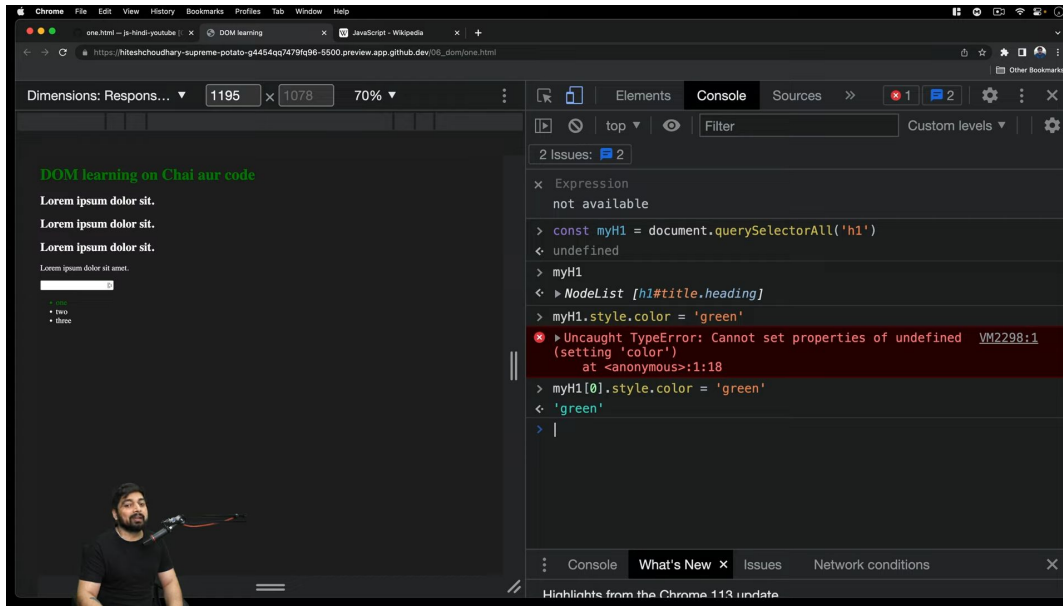

treating them as an array to access the property in querySelectorAll() method

▶ 26:50

to koi bhi `querySelectorAll()` ka mtlb aapko ek list of elements milti hai to array ki tarh hi treat krna

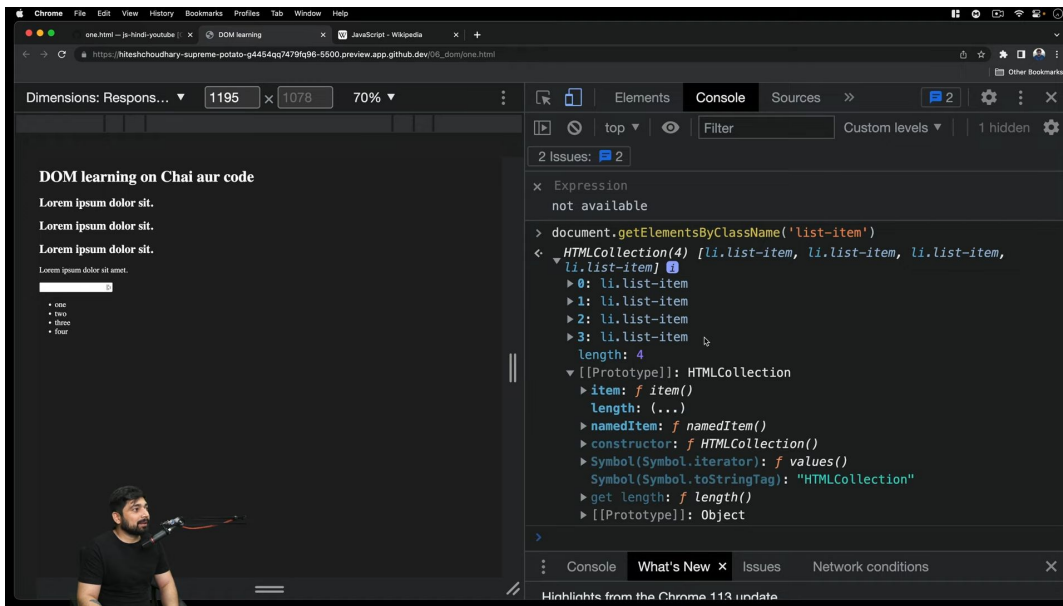

▶ 27:29

▶ 27:48

you can use various loops like `foreach` loop in `nodeList` which is the return type of `querySelectorAll()`

▶ 29:40

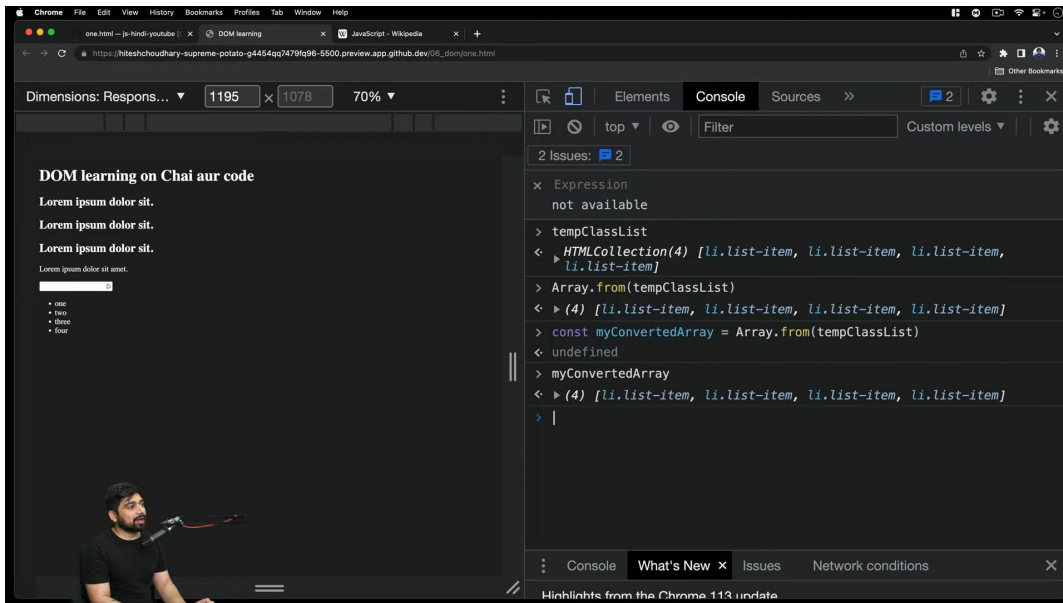

getelementByClassName() ki properties me loop nhi lga paoge baaki chize explore krlo

▶ 31:16

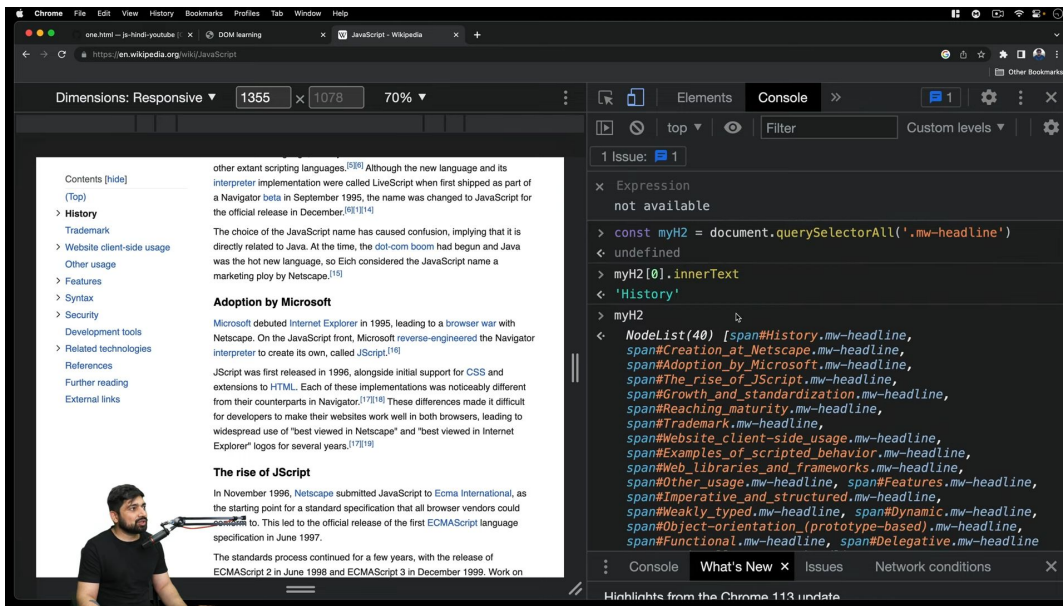

to phir Array.from(temp) se aap temp ko array bna kr usme loop use kr skte hai

▶ 33:34

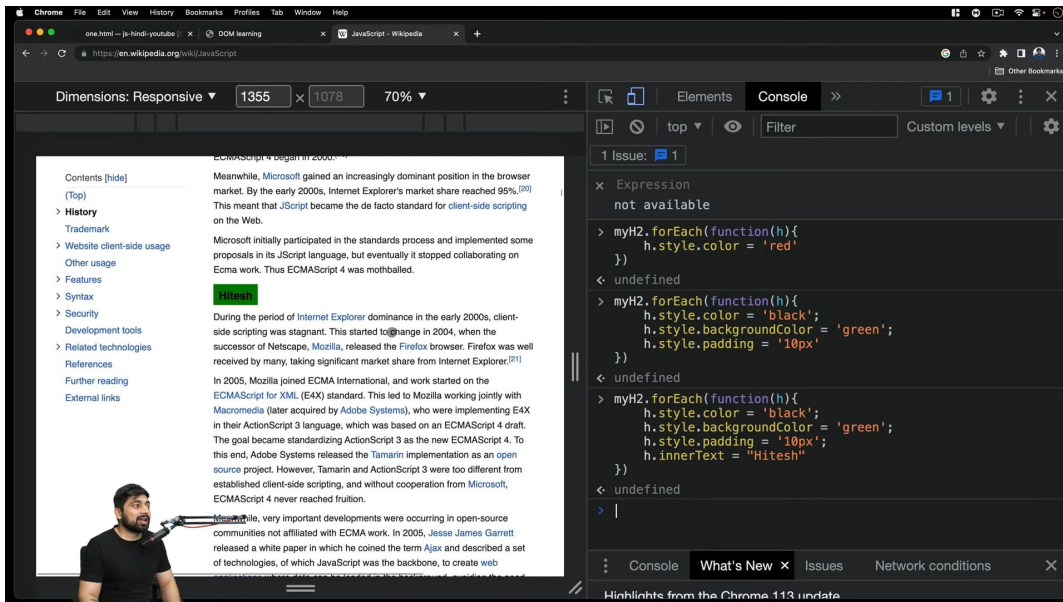

yha humne array me convert kr diye hai

▶ 34:11

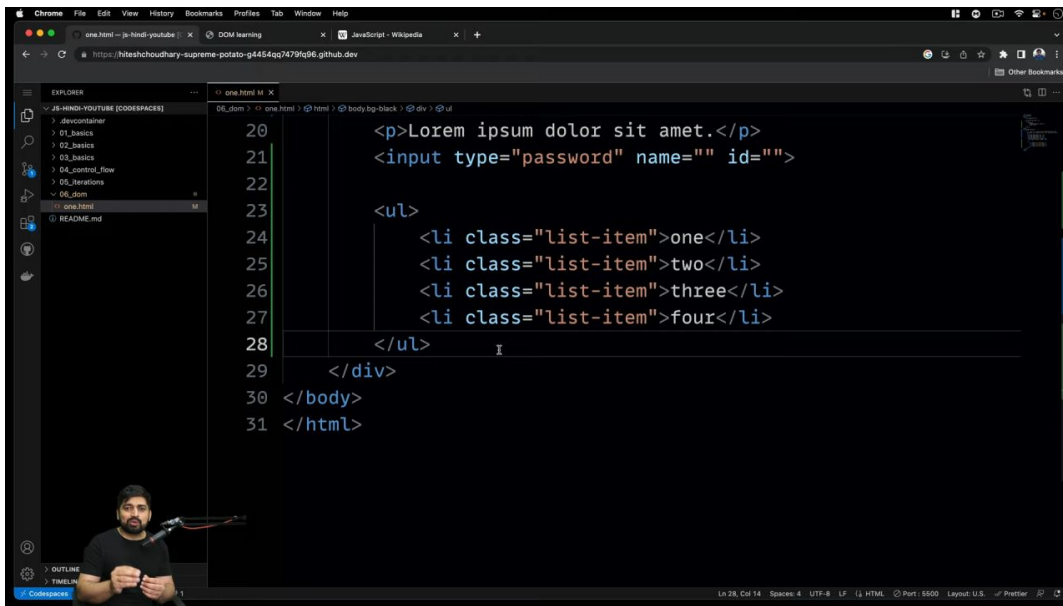

myh2 ke andar saare h2 tags ko manipulate krna hai

38:08

for each loop se manipulate kr liye :)
